Date 12/7/2022

IQAC, Co-ordinator
Kurukshetra University,
Kurukshetra

Respected Sir,

The college collected feedback on syllabus and its implementation from the students, alumni & teachers for the session 2020-21. Following are the recommendations of the Feedback Collection and Analysis committee of the college under the aegis of IQAC.

1. Syllabus should be updated after a fixed interval of time with more emphasis on practical and current knowledge of the subject.
2. Syllabus of some subjects like Mathematics and Physics is very lengthy and should be reduced.
3. More topics of Applied Botany, preparation and formulation of some Ayurvedic, Unani and Homoeopathy medicines should be added.
4. Case studies and internship must be a mandatory part of syllabus in subjects of Commerce, Computers, Chemistry, Applied Physics etc.
5. Learning to use some mathematical softwares should be part of syllabus.
6. Numerical portion in part of Physical Chemistry and reaction mechanism in part of Organic Chemistry should be based on CSIR NET exam pattern, as this will be beneficial for students to crack this type of exam.
7. Syllabus should be evenly distributed in both the semesters.
8. There should be uniformity in syllabus across the country.
9. The project work should be a part of syllabi of Post-Graduation Courses.

This is for your kind Consideration.

Thanking you,

Yours sincerely,

Dr. Rahul Khanna
Offg. Principal
