Mukand Lal National College,
YAMUNA NAGAR (Haryana)

Dr. Ritu Kumar

Principal (Offg.)

Criterion 7 – Institutional Values and Best Practices

7.1.3 Quality audits on environment and energy regularly undertaken by the Institution.

Action taken Report and Achievement Report as Clean and Green Campus Initiatives:

1. The college teachers, retired teachers and the institute contributed to the establishment of the LPG Cremation plant at Yamuna Ghat, Yamuna Nagar.
2. To save depleting cover and pollution all around, the college has taken up mass tree plantation not only on the campus but also in and around Yamuna Nagar. Plants are distributed to the young students to be planted by them in open spaces. To plant a tree and to own it teaches the students to nurture the tree to create a green cover all around.
3. Haryana Environment Society (HES), an active NGO under the guardianship of a Mukandian and a renowned teacher of the college Dr. S. L. Saini, is working efficiently for the plantation of the trees and environment protection. The Green Man is honoured by the Governor of Haryana for his green initiatives.
4. The college has a beautiful Botanical Garden having the rarest of the rare plant species.
5. The college has the facility of Sewage Treatment Plant (STP). The treated water is reused for watering the lawns and to keep the plants lush green on the college campus.
6. The college has four Rain Harvesting Plants in the spirit that every drop of water should be utilized in harvesting.
7. About 40 Harvesting Wells have already been installed in all the Mukand Institutions with the mission:

“Not a drop of rainwater will go waste and
Every drop will be utilized for the Mother Earth.”

8. A committee on Energy, Green and Environmental Audit has been constituted in the college. The college administration organizes tree plantation drives on the campus as well as outside the campus.

9. Tree plantation is our regular feature to provide a green and clean environment to the students on the campus. Flowering and shading trees adorn all the open spaces.
10. Various slogans have been framed by the management to inculcate the habits of energy and environment conservation:
- i. Save Water – Save Energy – Save Green!
 - ii. Plant a Tree – Save the Earth!
 - iii. Reduce – Reuse – Recycle!
 - iv. Donate Red – Spread Green – Save Blue!
11. A green campus cannot be evolved without clean energy. With this mission, Solar Power Plants have been installed on the rooftop of the college. Solar lamps have been provided to light the streets of the institution. Solar Power Plants of about 700 KWp have already been installed and further expansion is being undertaken.
12. To teach students to say no to the use of plastic and encourage them to use biodegradable materials only, a campaign has been launched through NSS Units of the institution. Specially procured carry bags made of biodegradable material are distributed in the villages and other localities.
